

Pallet Trucks

T20 – T25 AP | SP

Capacity 2.0 – 2.5 t | Series 1156

Nimble all-rounder

- Compact pallet truck for efficient loading and unloading of delivery vehicles as well as transport and order picking
- Foldable operator's platform to use the vehicle as a manoeuvrable pedestrian or ride-on model (AP version)
- Unique platform concept with standing position at a 45° angle for better all-round vision and a comfortable body posture (SP version)
- Innovative Linde e-driver control concept for optimum truck handling in the 45° standing position (SP version)
- Fully suspended operator compartment reducing shocks and vibrations for smooth operation

CHARACTERISTICS

Safe 45° stand-on fixed platform

Safety

- Automatic adjustment of operating speed when cornering to prevent risky manoeuvres
- Foot detection automatically brings the vehicle to a smooth stop when operator's feet leave the platform (SP version)
- Fold-up side bars to protect the operator from injury in the event of collision (AP version)
- Dead man's switch and traction control for the highest possible safety in every work

Ergonomic, height-adjustable tiller

Ergonomics

- Fully decoupled operator platform for effective protection against vibrations and shocks
- Electric power steering for effortless vehicle control, including automatic steering resistance adjustment
- Unique concept with 45° operating position for optimal all-round view without straining back and neck (SP version)
- Innovative steering concept Linde e-driver for optimum, single-handed control of the vehicle in the 45° position if required (SP version)
- Automatic and gradual adjustment of vehicle speed for precise manoeuvring in tight spaces

Li-ION technology available

Handling

- High top speed of 14 km/h without load for fast transport travel
- Powerful 3 kW three-phase motor for rapid acceleration and maximum vehicle performance on inclines
- Special starting system to prevent unintentional rolling backwards on steep ground (e.g. on loading ramps)
- Mechanically sprung or hydraulic castor wheels guarantee high operating stability on uneven ground
- New generation of Li-ION batteries for more efficient energy use and optimised charging management

Foldable platform with robust sideguards

Service

- Robust three-phase motor for long service intervals and low maintenance costs
- Solid construction with durable parts and sturdy chassis for maximum vehicle availability
- Effortless accessibility of all relevant components thanks to consistent design-to-service principle
- Innovative CAN bus architecture for easy access to all vehicle data via diagnostic connector
